This unique CP-1A Pickup was the first worldwide to include two mini-pots in endpin jack preamp (middle & gain control) for a personal sound adjustment. Considered as the BEST KEPT SECRET in Guitar World it was made until late 2007 for few of the World's best guitarists and is replaced by the new CP-1A Professional with fixed middle & gain levels. These one-off Signature Pickups were made in honour to the mentioned guitarists and have never appeared in sales.
